Examiner's Detailed Office Action

1. Claims 54-86 (renumbered as 1-33) are allowed.
2. Examiner's note: Regarding the present application, full faith and credit has been granted the work performed by the prior Examiner. Moreover, Examiner has determined there are no outstanding double patenting issues regarding applicant's prior issued patent (6,745,172) and the present application number 09/909,241.

REASONS FOR ALLOWANCE

3. The following is an Examiner's statement for reasons for allowance:
4. The closest prior art *Coleman* (USPA PUB: 20030061202) does not teach or render obvious applicant's claimed invention. In particular, as pointed out below, the prior art lacks certain features and the combination as specified in the respective claims.
5. With regards to claim 54 *Coleman* does not disclose "... c) *determining a problem domain based at least in part on the set of problem answers; d) presenting a set of needs questions to the customer, the set of needs questions including one or more questions corresponding to the determined problem domain; e) receiving a set of needs answers from the customer, the*

set of needs answers including one or more answers to the set of needs questions, each needs answer corresponding to at least one of the one or more product needs of the customer; f) transforming at least a part of the set of needs answers into one or more values to represent a set of product traits, the one or more values comprising at least one of a fuzzy value or a crisp value, at least a portion of the one or more values corresponding to at least one of the one or more product needs of the customer; g) processing at least one of the one or more values to produce one or more product recommendations, wherein the one or more product recommendations correspond to the determined problem domain, wherein at least a portion of the step of processing is performed on a computer processor using fuzzy logic; and h) providing at least one of the one or more product recommendations to the customer.”

6. With regards to claim 80 Coleman does not disclose “ ... c) processing the received input through fuzzy logic to produce one or more product recommendations corresponding to the customer's product needs, the step of processing comprising transforming at least a part of the information relating to a customer's product needs into at least one of a fuzzy value or a crisp value; and d) displaying an output to the agent via the GUI, the output comprising the one or more product recommendations.”

7. With regards to claim 84 Coleman does not disclose “ ... i) transforming at least a part of the set of answers into one or more values to represent a set of product traits, the one or more values comprising at least one of a fuzzy value or a crisp value; at least a portion of the one or more values corresponding to at least one of the one or more product needs of the customer, and ii) processing at least one of the one or more values to produce one or more product recommendations, wherein at least a portion of the step of processing is performed on a computer
